

WEST SIDE NEIGHBORHOOD STORAGE PROJECT-PHASE 1A

October 31, 2019

CONSTRUCTION UPDATE

Dear Wilmette Resident:

DiMeo will start the storm sewer work on Lavergne between Washington and LaCrosse on **November 4th**. All thru traffic from LaCrosse to Washington will be detoured during daytime hours, typically 7AM-5PM. The intersection of Washington and Lavergne will also be closed on the north leg of the intersection during this time. These closures are expected to last 3-4 weeks.

Throughout the construction hours, DiMeo will provide local access to driveways within the closure as work allows. When the sewer crews will be working in front of your residence a member of the construction team will knock on your door to notify you a few hours before so your vehicle can be moved. Should your house be affected first thing in the morning the team will notify you the night before. Expect your driveway access to be blocked for a few hours. During these times please park on the side streets.

As stated before, the project team has been in contact with the School District 37 transportation representatives. School buses will be rerouted as needed and communicated to all users of the busing service in advance.

Refuse collection will be accommodated with early morning pickups to avoid construction traffic. It is recommended to have refuse containers at the curb the evening prior to our regular pickup day. Leaf collections will be accomplished as usual until conditions prevent curb side pickup. Advanced notice will be provided when alternative collection methods are necessary.

We regret any inconvenience the construction may bring and thank you for your patience throughout this process. Should you have any concerns or questions about the project, please do not hesitate to contact the project team on the website www.wsnsp.com or the resident engineer **Tracy Wais, PE**, at **847-878-0501** or twais@cbbel.com.
