

WEST SIDE NEIGHBORHOOD STORAGE PROJECT-PHASE 1A

October 1st, 2019

CONSTRUCTION UPDATE

Dear Wilmette Resident:

We are pleased to inform you that the much-anticipated West Side Neighborhood Storage Project is scheduled to begin this week. The general contractor on this project will be DiMeo Brothers of Elk Grove, IL.

This project involves installation of new sewers to increase the capacity of the storm sewer system throughout the neighborhood. The water main on your block will also be replaced as part of this project. All underground utility work is expected to be completed by late November. If weather allows, concrete curbs and sidewalks will be replaced as needed, streets will be fully resurfaced, and parkway sod and driveway restoration will be completed by early December.

DiMeo will begin this week on some pre construction items, such as the placement of traffic control devices, tree protection fencing, tree root pruning, sewer televising, and construction layout. **Underground sewer work is scheduled to begin the week of October 21**, until then all roadway access will remain uninterrupted.

Roadway access will be interrupted during sewer and water main installation. Impacts will consist of closures of the roadway to thru traffic during daytime work hours, typically 7 AM to 5 PM. DiMeo will provide local access to driveways within the closure zone as work allows. Notifications will be delivered to all properties within the closure zone prior to access impacts.

Refuse collection will be accommodated with early morning pickups to avoid construction traffic. It is recommended to have refuse containers at the curb the evening prior to your regular pickup day. Leaf collection will be accomplished as usual until conditions prevent curbside pickup. Advanced notice will be provided when alternate collection methods are necessary.

We regret any inconveniences the construction may bring and thank you for your patience throughout this process.

Should you have any questions or concerns about the project or any upcoming work, please do not hesitate to contact the project team on the website www.wsnsr.com or the resident engineer **Tracy Wais, PE**, at **847-878-0501** or twais@cbbel.com.
